IKHIODA HEPHZIBAH OVIE

Software Engineer

Fadeyi, Lagos State, Nigeria | hephzikhioda@gmail.com | 07089330401 / 09157444188 | LinkedIn: in/joseph-hephzibah-ikhioda-73154026a | GitHub: github.com/Hephzi-boy

PROFESSIONAL SUMMARY

A statistics graduate with a strong background in data analysis and technical analysis, complemented by hands-on experience in backend development (Django, Supabase, FastAPI, PostgreSQL), mobile development (React Native, Flutter, Expo), and web development (Next.js, React.js). Skilled in API design, authentication and authorization, cloud services (AWS), and end-to-end application maintenance. A quick learner with strong problem-solving abilities and a genuine passion for exploring new technologies — particularly in mobile development, backend architecture, and applied data analysis.

PROFESSIONAL EXPERIENCE

React Native Developer (Mobile Application Developer) — *Lights on Heights Oct* 2023 – 2026
- Translated Figma designs into pixel-accurate React Native builds.
- Implemented authentication and authorization across API integrations.
- Designed and documented endpoints using APIdog.
- Shipped continuous Android and iOS builds, merging updates to the live application.
- Maintained and supported the application post-release.

Backend Developer & React Native Developer — *LOETH Technology Dec* 2023 – Present, Remote
- Built registration and login endpoints using APIdog.
- Implemented authorization with PostgreSQL and integrated AWS services.
- Developed backend services using Django.
- Handled authentication/authorization of APIs and ongoing application maintenance.

Lead Backend Developer — *ORDA Customer Management Group Jun* 2024 – Mar 2025, Remote
- Built registration and login endpoints using APIdog.
- Owned authentication and authorization architecture across APIs.
- Directed ongoing maintenance of the mobile application.

Mobile Application Developer — *ORDA Customer Management Group Jun* 2024 – Mar 2025, Remote
- Managed Node.js dependencies supporting the mobile application.
- Implemented React Native libraries including react-native-reanimated and export components.
- Debugged and tested the application to resolve new and existing errors.
- Delivered pixel-accurate implementations from Figma designs.

Frontend Developer (Next.js) — *D'Anette Group Nov* 2025, Remote Project
- Integrated backend endpoints for a basic server implementation.
- Implemented UI/UX designs from Figma with high fidelity.
- Debugged and tested the application; maintained the live web app.

Frontend Developer (Next.js) — *Omalicha Styles Group Feb* 2026, Remote Project
- Integrated backend endpoints for a basic server implementation.
- Implemented UI/UX designs from Figma with high fidelity.
- Debugged, tested, and maintained the web application.

Frontend Developer (React.js) — *Matric Dance (South African School Group)*Feb 2026, Remote Project
- Integrated backend endpoints for a basic server implementation.
- Implemented UI/UX designs from Figma with high fidelity.
- Debugged, tested, and maintained the web application.

Frontend Developer (Next.js) — *Faveremit Group Oct* 2024, Remote

- Integrated backend endpoints for a basic server implementation.
- Implemented UI/UX designs from Figma with high fidelity.
- Handled authentication and authorization of APIs.
- Debugged, tested, and maintained the web application.

Frontend Developer (Flutter) — *Faveremit Group Mar* 2025, Remote

- Debugged the mobile application across issues and edge cases.
- Applied authorization using PostgreSQL and integrated AWS services.
- Implemented complete backend integration via Swagger endpoints.
- Handled authentication/authorization of APIs and app maintenance.

Frontend Developer (React Native) — *GrowthRings Jun* 2023 – Present, Remote

- Debugged the mobile application across issues and edge cases.
- Applied authorization using PostgreSQL and integrated AWS services.
- Implemented complete backend integration via Swagger endpoints.
- Handled authentication/authorization of APIs and app maintenance.

Web3 Developer (Solidity & JavaScript) — *Merc Group Jun* 2023 – Present, Remote

- Wrote, tested, and deployed smart contracts (Solidity, EVM chains).
- Integrated wallet connectivity (MetaMask, WalletConnect).
- Built APIs bridging on-chain and off-chain data.
- Built interfaces for decentralized applications (dApps).
- Read/wrote on-chain data and listened to contract events.
- Audited smart contracts for security vulnerabilities.

Python Developer — *GrowthRings Jun* 2023 – Present, Remote

- Authored API documentation and managed data migrations.
- Implemented role-based access control and third-party API integrations.
- Developed an AI-powered fraud detection application.
- Performed schema design and query optimization.

FEATURED MOBILE APPLICATIONS

StoneCircle (Play Store): https://play.google.com/store/apps/details?id=com.stonecircle.community&pcampaignid=web_share
StoneCircle (iOS): https://apps.apple.com/us/app/stonecircle/id6742403322
Faveremit (Play Store): https://play.google.com/store/apps/details?id=com.faveremit.faveremit&pcampaignid=web_share
Faveremit (iOS): https://apps.apple.com/ng/app/faveremit-gift-cards-coins/id1658312826

EDUCATION

Higher National Diploma
Yaba College of Technology, Yaba, Lagos — Oct 2020 to Dec 2022

Ordinary National Diploma
Yaba College of Technology, Yaba, Lagos — Mar 2016 to Dec 2018

SKILLS

Languages & Frameworks: Python, R, SAS, Django, FastAPI, React Native, Flutter, Next.js, React.js

Tools & Platforms: PyCharm, Tailwind CSS, NativeWind, Expo Router, AWS, PostgreSQL, Supabase, Swagger, APIdog

Analytics: Tableau, Power BI, Google Analytics, Google AdWords, SEMrush, A/B Testing, Market Research

Core Strengths: API design & security, authentication/authorization, cross-platform mobile development, technical analysis
